BUILD-CENTER COMPANY

About

We are Staff for design, develop, Arduino, and maintain applications, frameworks or other software components for businesses or consumers.

Our Skills

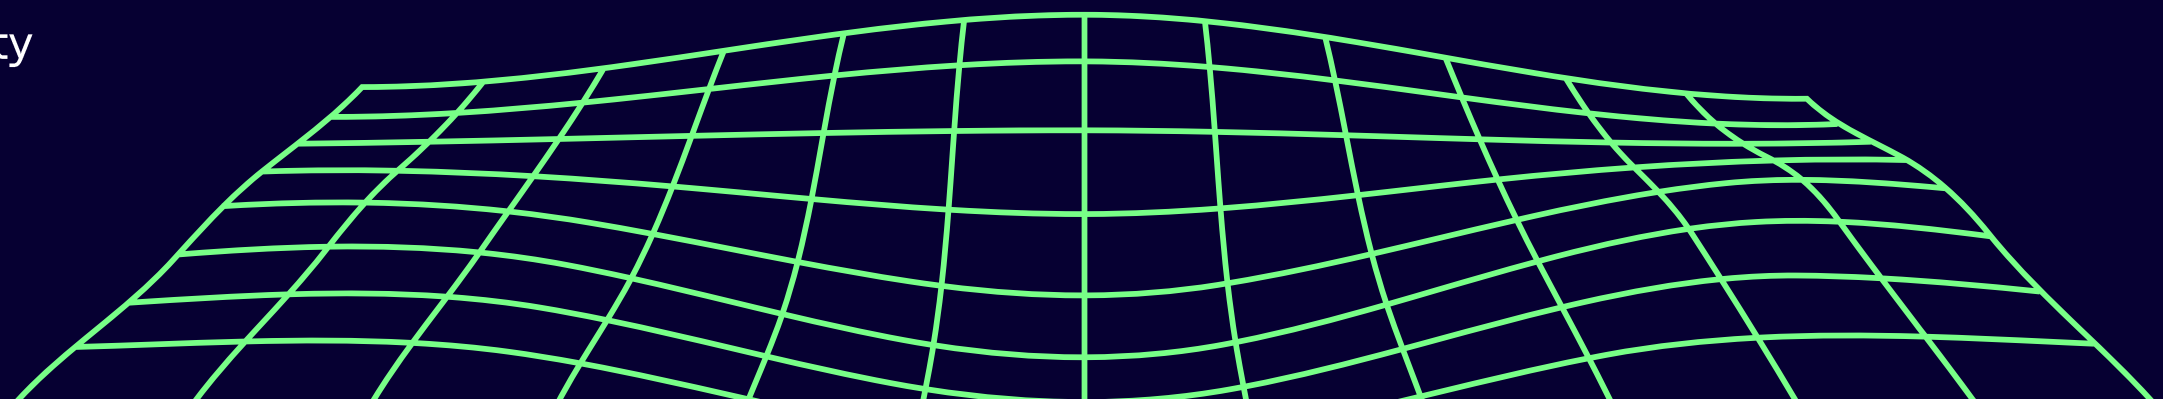

At Build Center, we pride ourselves on a diverse set of technical and creative skills that allow us to deliver top-quality solutions across a wide range of industries. Our team is passionate, skilled, and always evolving with the latest technologies.

Our Services

At Build Center, we offer a wide range of innovative and professional services designed to meet the growing demands of businesses in the digital world. Our expertise lies in delivering high-quality solutions that are both reliable and scalable.

Projects

At Build Center, we bring ideas to life through impactful and innovative projects that combine software development with intelligent hardware solutions. Each project we deliver is tailored to meet the unique needs of our clients—across industries such as technology, education, automation, and business services

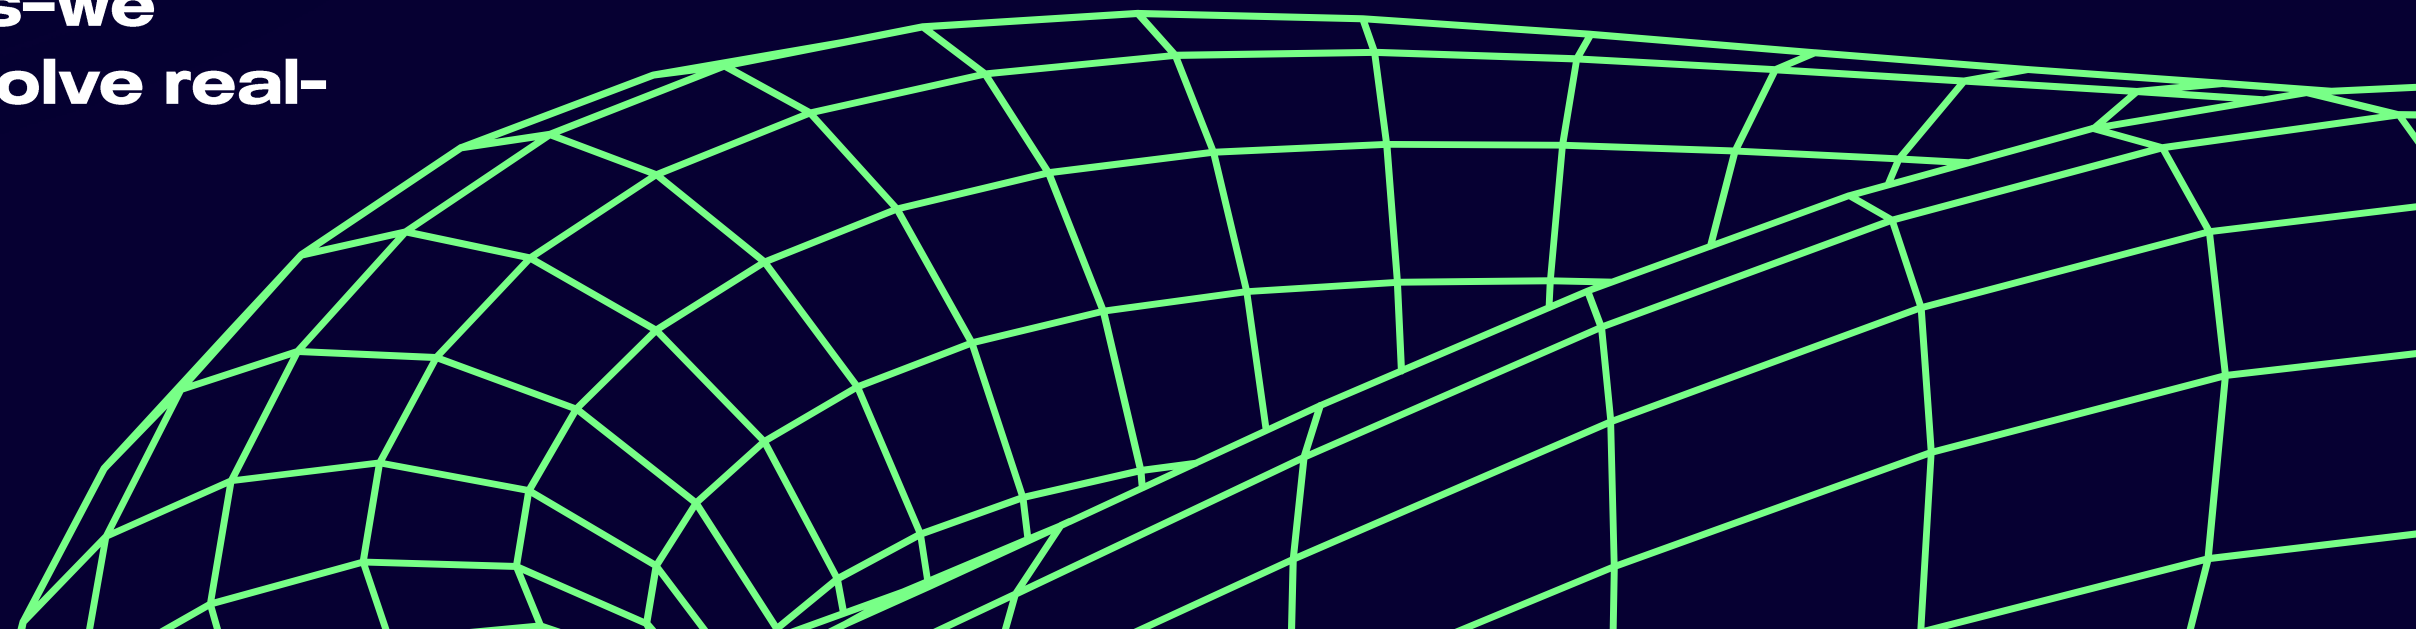

CONTENT

1 At Build Center, we believe in the power of technology to transform ideas into reality. Let us help you build something extraordinary.

2 At Build Center, our goal is to deliver smart, efficient, and future-ready solutions—built to last.

3 Every project reflects our commitment to quality, creativity, and reliability. At Build Center, we don't just build systems—we create solutions that solve real-world problems.

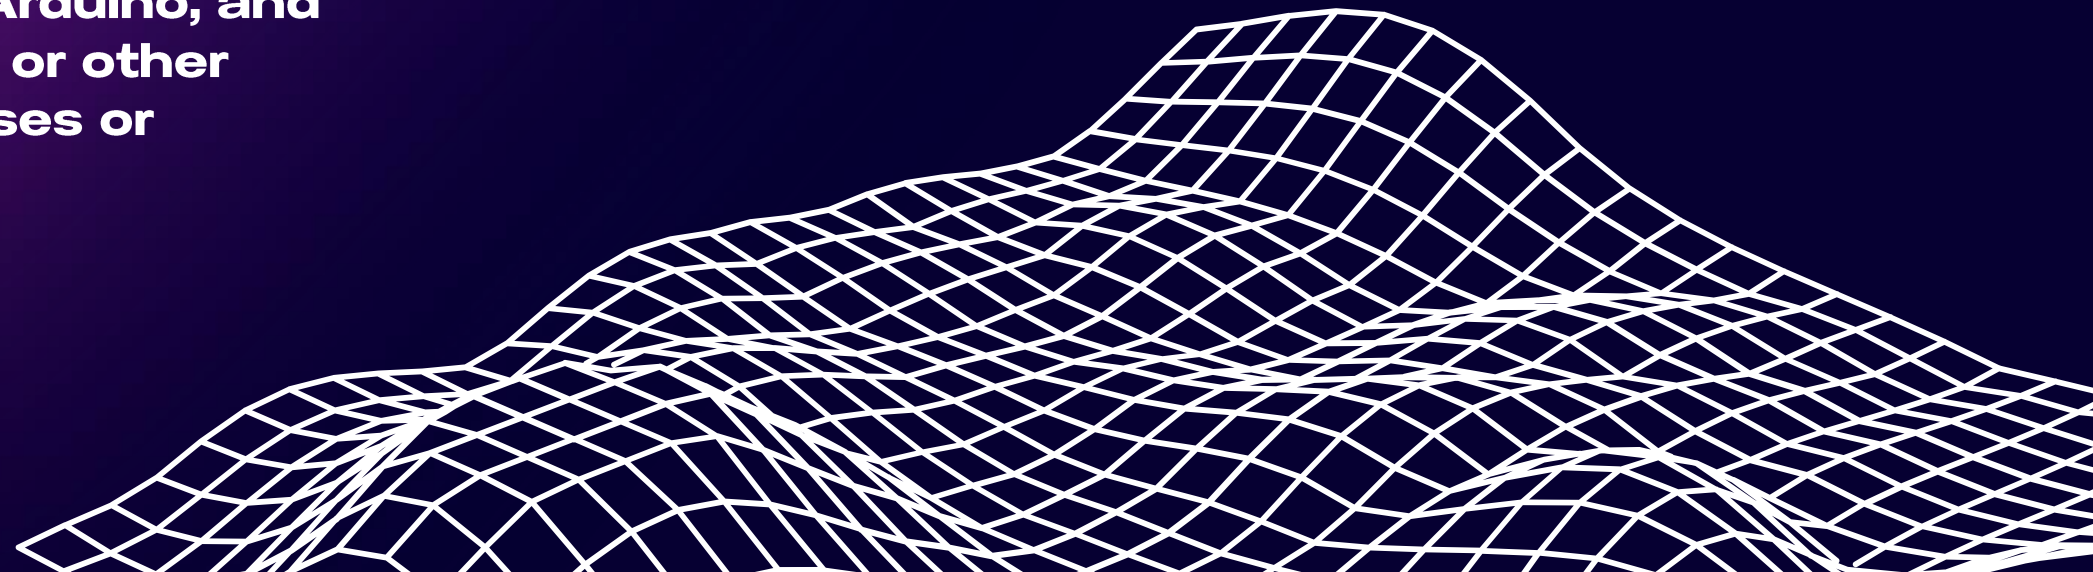

4 At Build Center, our skills turn your ideas into powerful, working solutions.

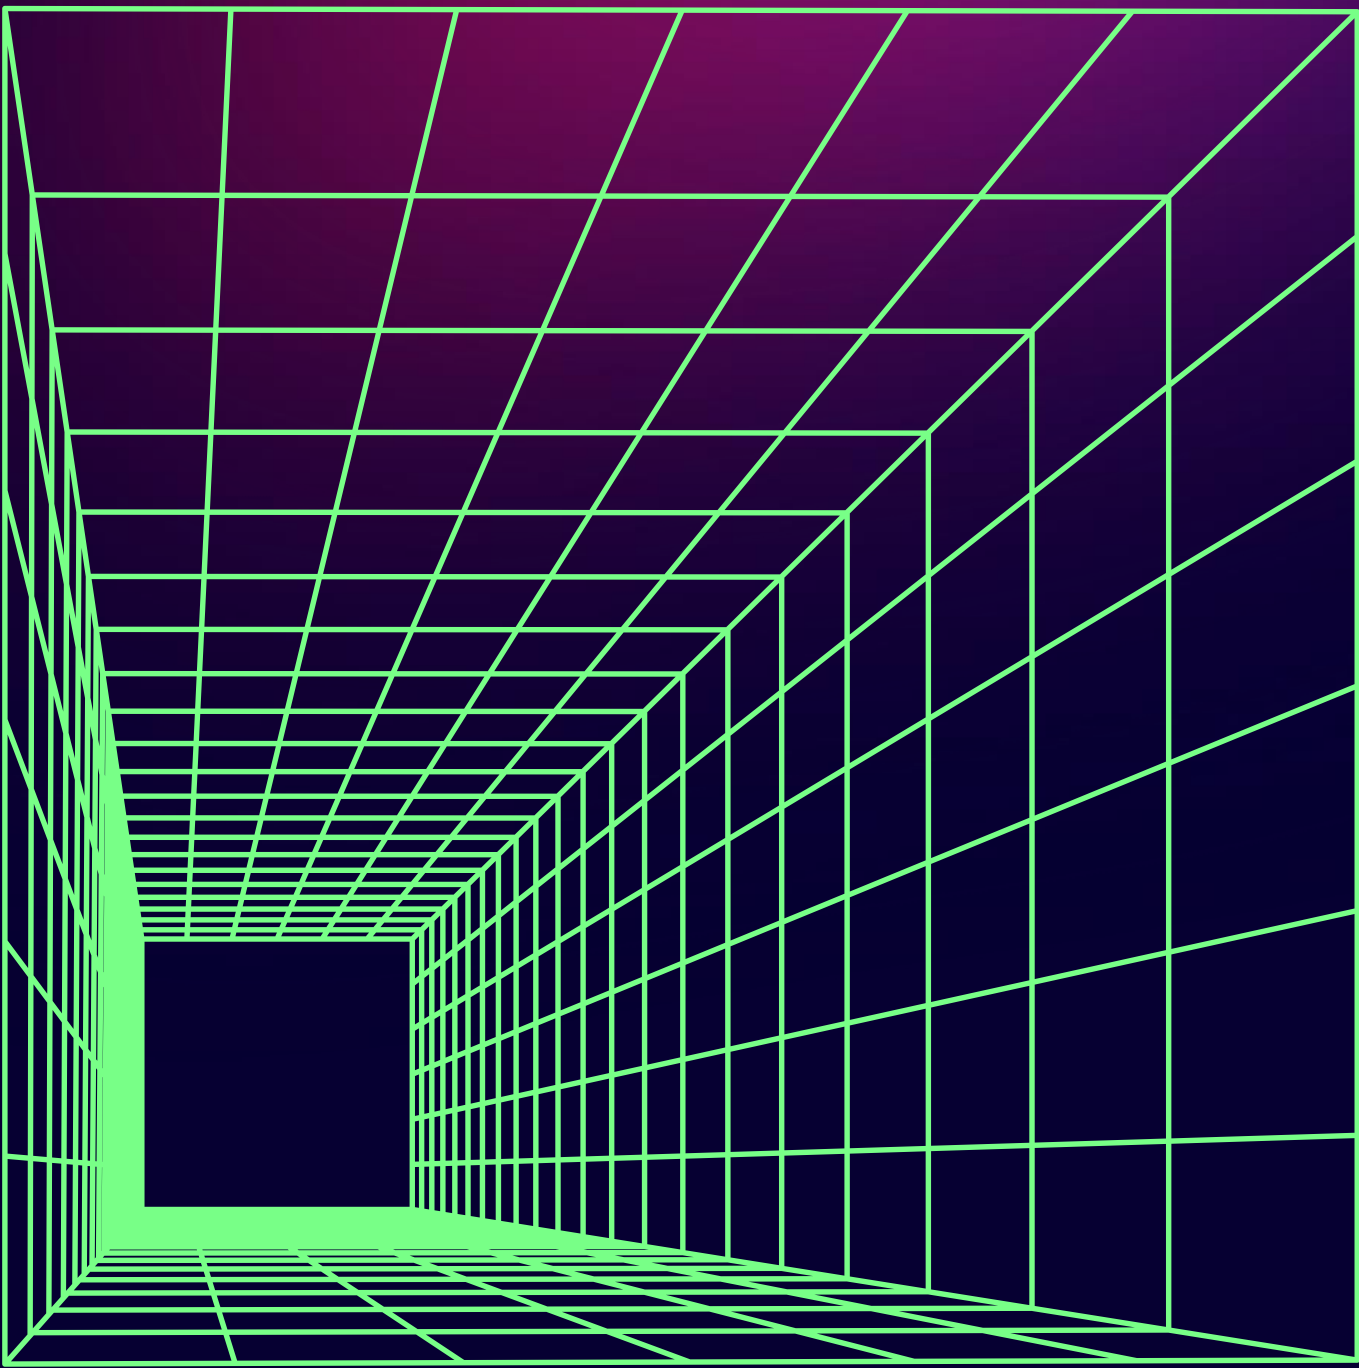

About

We are Staff for design, develop, Arduino, and maintain applications, frameworks or other software components for businesses or consumers.

WELCOME

Build Center is a multidisciplinary technology company committed to designing, developing, and maintaining intelligent software and hardware solutions that help businesses and individuals thrive in the digital world. We specialize in web development, software engineering, embedded systems, and Arduino-based projects, offering our clients a complete package of services from concept to completion.

We started Build Center with a clear vision: to bridge the gap between creativity and technology. Our team is composed of skilled developers, engineers, and problem solvers who are passionate about building reliable, user-friendly, and scalable solutions. Whether we're crafting a website for a small business, developing automation tools for industrial use, or integrating smart hardware into a project, our mission remains the same—deliver high-quality work that makes an impact.

ABOUT CONFERENCE

WHO WE ARE?

Build Center is a creative and technically skilled team of developers, engineers, and innovators who are passionate about building smart digital and embedded solutions. We are not just a software company — we are a technology partner focused on helping businesses and individuals turn their ideas into reality.

WHAT WE DO?

At Build Center, we design and develop smart, practical, and future-ready technology solutions that help individuals and organizations achieve their goals. Our work spans across web development, software engineering, and embedded systems, offering a complete digital and hardware development experience.

A person stands in the center of a futuristic, wireframe environment. The background is a gradient of blue and green, with complex, glowing wireframe structures resembling a network or data visualization. The person is looking towards the right side of the frame.

My Teams

Welcome to Build Center

At Build Center, we are more than just a team — we are a collaborative force of creative minds, technical specialists, and innovative problem-solvers. United by a shared passion for excellence, we blend creativity with precision to deliver intelligent, high-performance solutions that exceed expectations.

Every member of our team brings unique expertise and dedication, ensuring that each project is executed with care, efficiency, and a deep understanding of our clients' goals. Whether it's development, design, or strategic support — we're here to turn challenges into opportunities and ideas into reality.

Mohammed Abubakr

Muhammad Abubakr, computer engineering student, builds Windows Forms C# management systems and Arduino electronics projects. Running Build-Center (2024–25), with IT background (2019–20), skilled in .NET, SQL Server, and microcontrollers

Mohammed Sarkawt

Mohammed Sarkawt Azeez is a freelance mobile app developer and UI/UX designer since 2021. He builds cross-platform Flutter apps, crafts intuitive interfaces (Figma), and manages projects efficiently.

Ahmed Abubaker

Ahmad Abubakr is a full-stack web developer and MIS specialist. Since 2024 at Build Center, he tackles front-end, back-end, database, and systems integration. Skilled in ASP.NET Core, SQL, and UI/UX.

Hesham salm

Hesham Salm Sfuk is a versatile web developer and designer at Build Center since 2024. He crafts front-end/back-end web solutions, UI designs (Photoshop, After Effects), and holds IT experience from 2021–22

Mohmmmed Amir

Mohmmmed Amir ,and I'm about to give you a self-introduction speech. I'm going to tell you about myself in three parts: my skills and Experience and Education

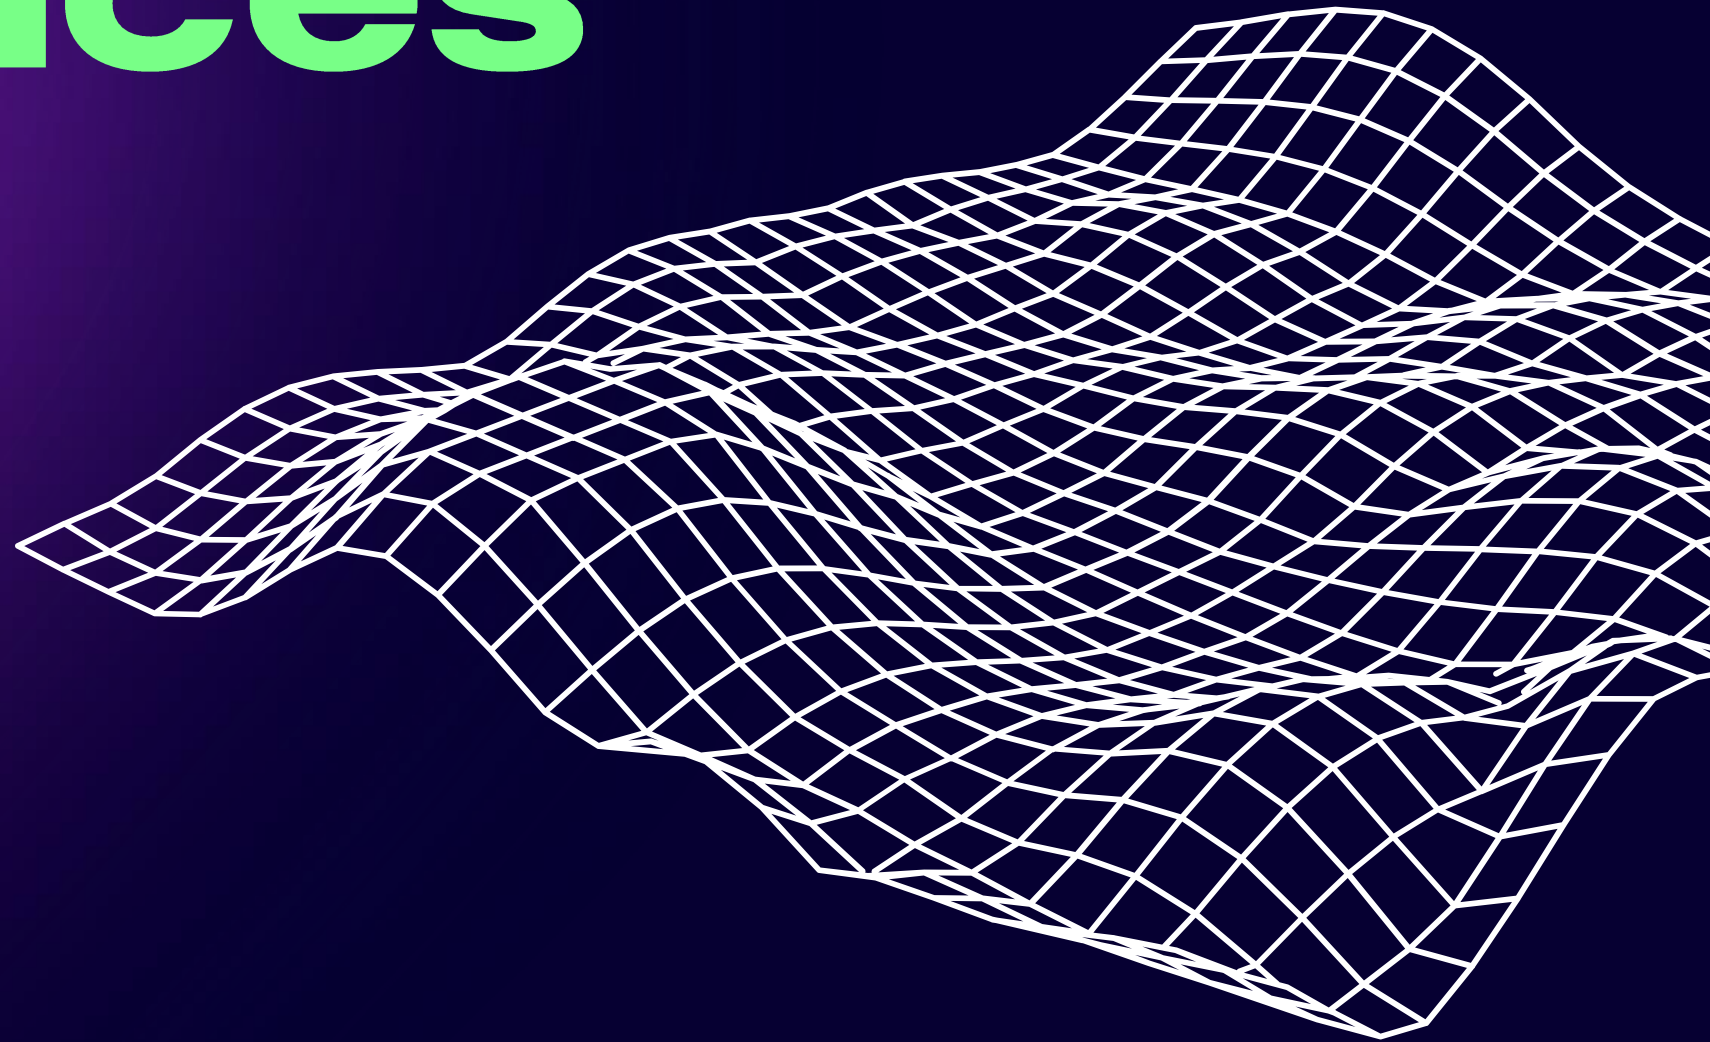

Dahren Sarkawt

Dahren Sarkawt is a motion graphic designer and animator at Build Center (2024–25). Skilled in After Effects and graphic video production, he crafts animated visuals for film, advertising, web, and social media.

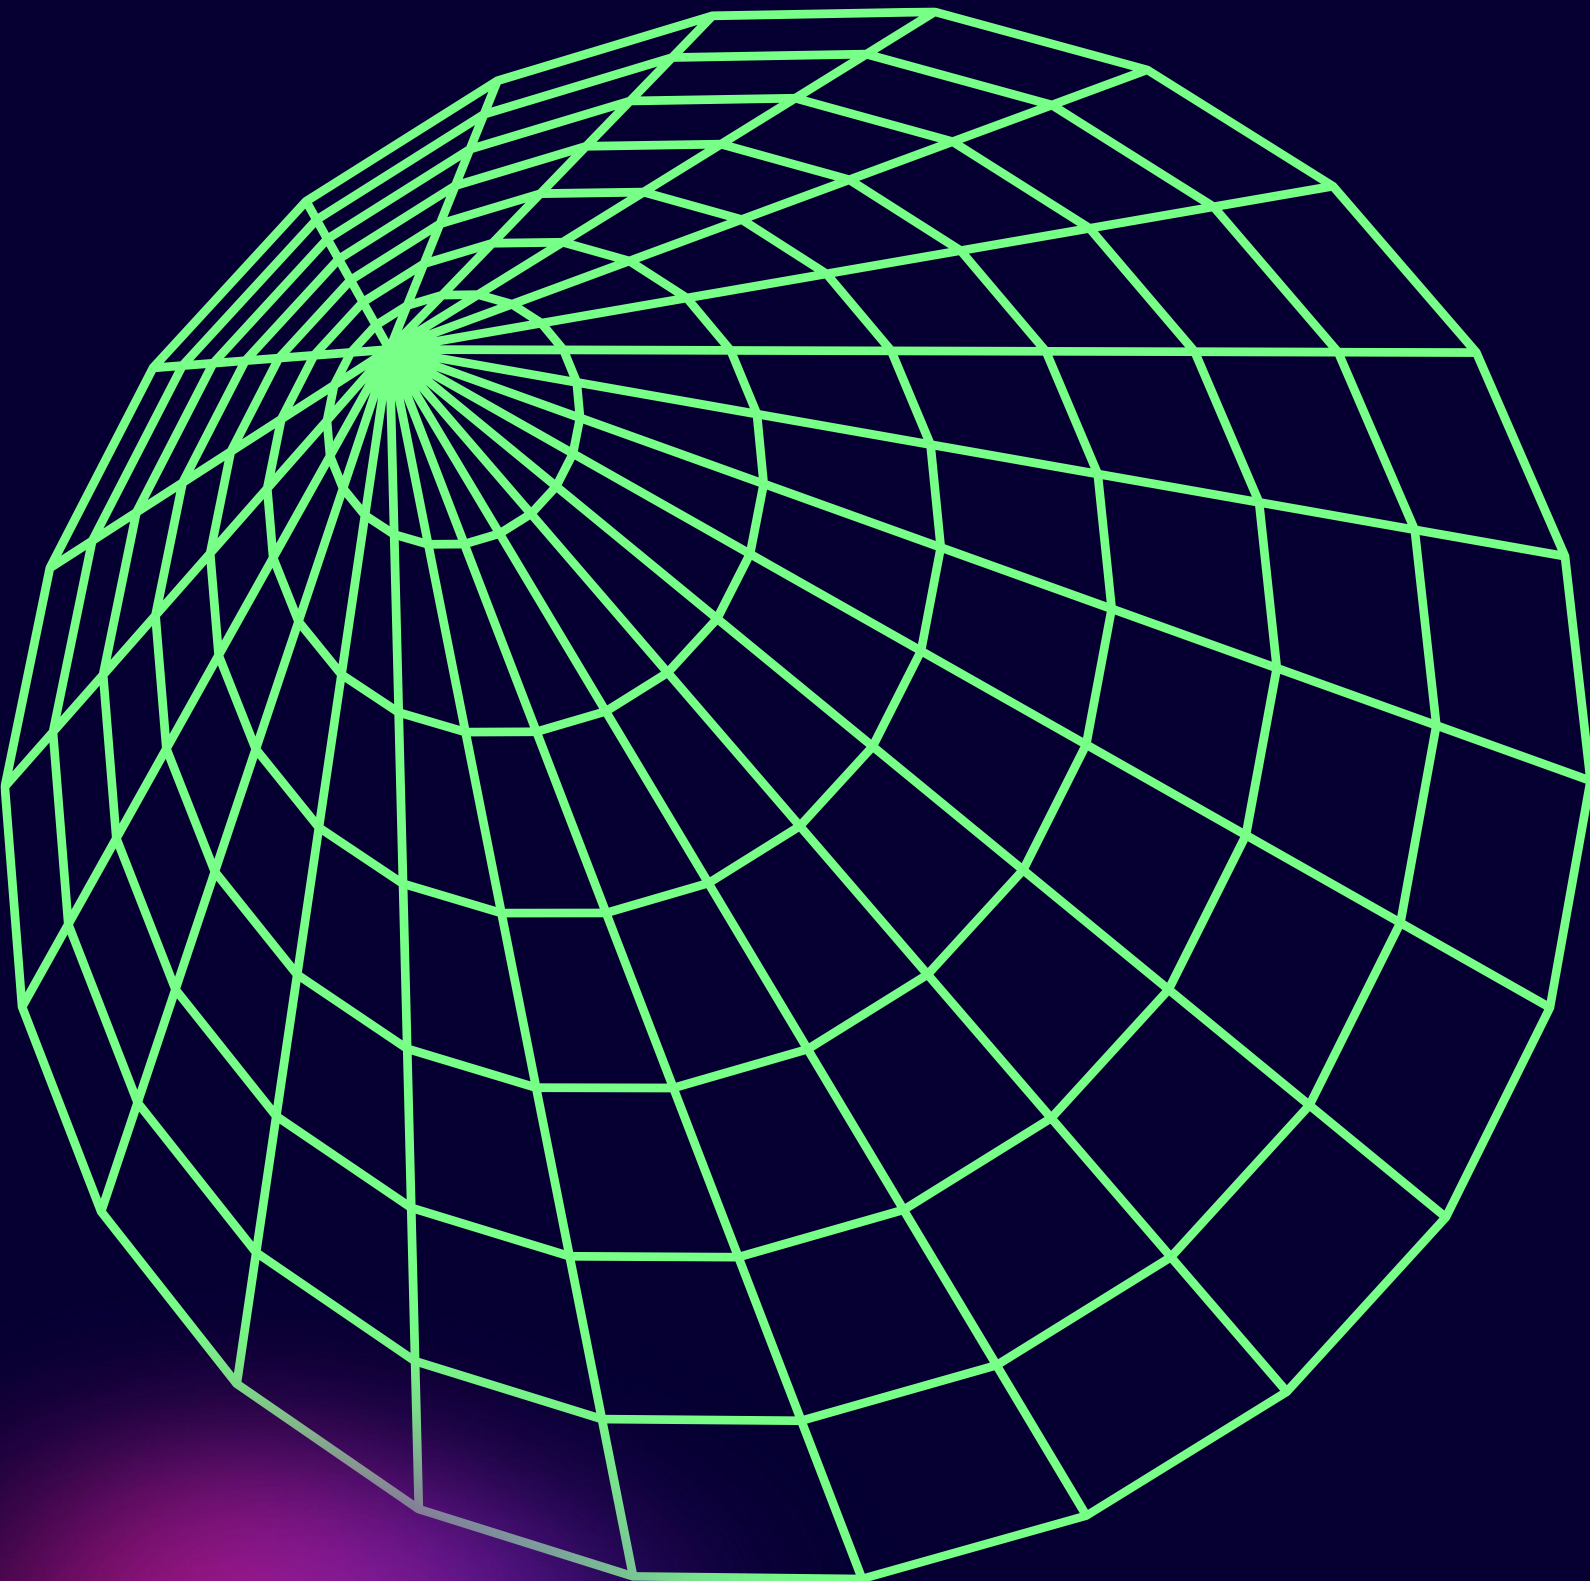

Our Services

At Build Center, we offer a wide range of innovative and professional services designed to meet the growing demands of businesses in the digital world.

Our Services

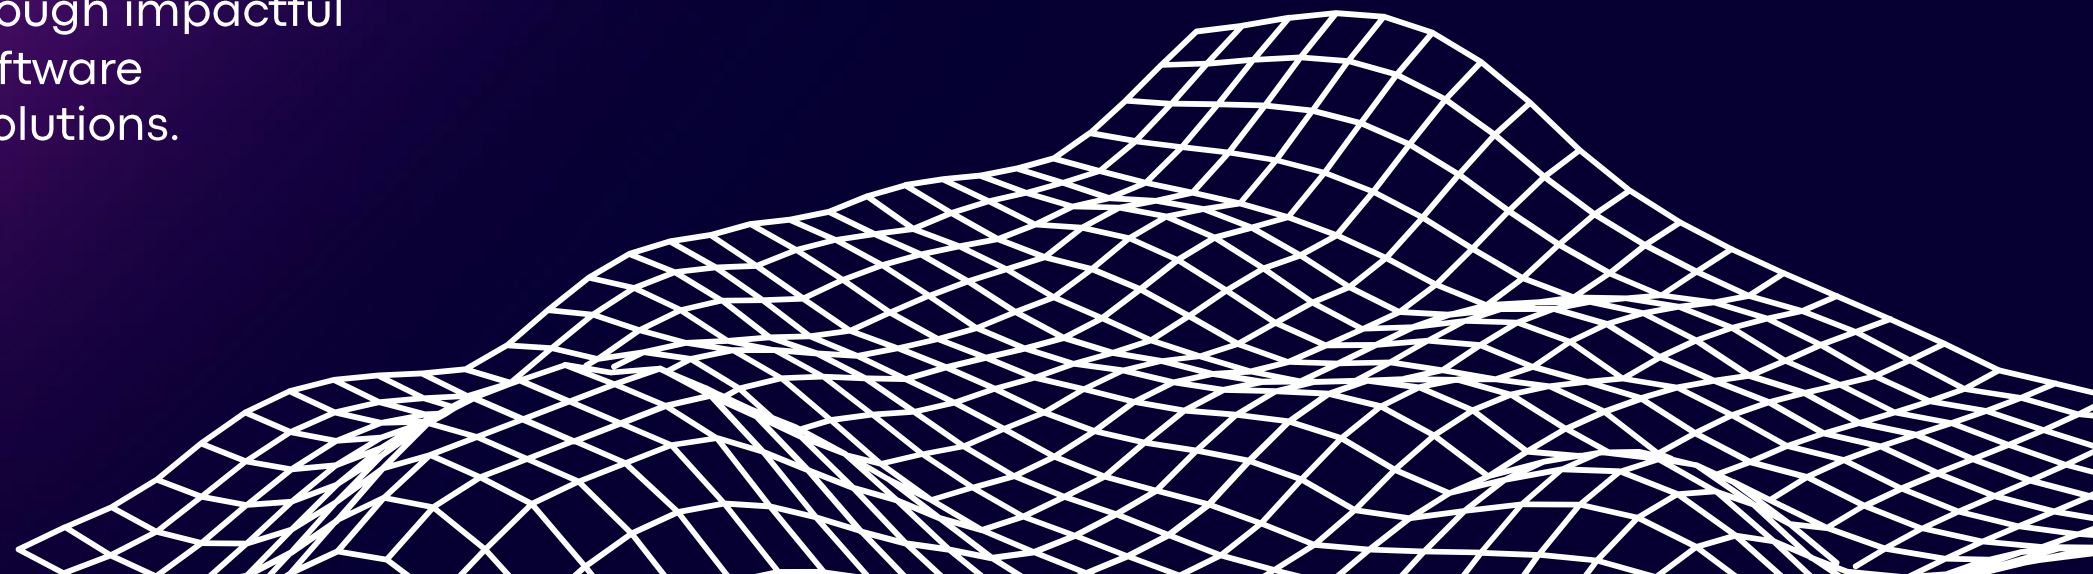

- **Web design and development:** Web design and development is an umbrella term that describes the process of creating a website.
- **Email marketing:** IT service providers can also help develop an email marketing strategy to communicate with current and new customers.
- **Data entry:** Data entry professionals use computers and data processing tools to enter data into a database or documentation platform.
- **Social media:** management is a catalyst for positive business impact. A strong social media presence amplifies a brand's awareness, supports customer care and extends reach to new audiences.
- **Advertising:** Advertising is the practice and techniques employed to bring attention to a product or service.
- **Mobile Application:** A mobile app is software that runs on a handheld device (phone, tablet, e-reader, iPod, etc.) that can connect to Wi-Fi or wireless carrier networks, and has an operating system that supports standalone software.
- **Design:** develops and creates visual ideas. But depending on the type of designer you are, the work you do could be anything from designing magazines and digital interfaces to creating a navigation system for a public space.
- **Management system:** Creating Mangmet System For Such a Market , hospital , Store , Shop. By using Windows Form C# and .Net Framework And Database.
- **A motion graphic design:** creates animated graphics for film and TV credits, advertising and digital marketing, website design, social media channels and more.

PROJECTS

At Build Center, we bring ideas to life through impactful and innovative projects that combine software development with intelligent hardware solutions.

PROJECTS

Build-Center empowers teams to deliver exceptional projects through smart planning, seamless execution, and real-time coordination. We connect on-site operations and office workflows—managing materials, schedules, and communication in one unified platform. The result: faster delivery, improved quality, and higher profitability—with less stress

building website

We build modern, high-performance websites that showcase your company and project portfolio with clarity and impact. From sleek design to smooth user experience, every site is crafted to reflect your brand and build trust. Whether you're launching or growing, our websites are built to impress, inform, and convert

building web application

We develop powerful, scalable web applications tailored to your business needs and goals. From backend logic to sleek user interfaces, we create tools that streamline operations and enhance user experience

building system management applications (SMA)

We build powerful desktop applications designed to streamline and manage complex business operations. Our solutions are fast, reliable, and user-friendly—tailored to your unique workflow and goals
